Dossier: Future trajectories of computation in design

Elif Eser, Bilge Kabaş
Web scraping and mapping urban data to support urban design decisions

Pınar Çalışır Adem, Gülen Çağdaş
Interpretation of urban data in the complex pattern of traditional city: The case of Amasya

Miras Bay Yıldırım
A model for parameterization of urban regulations

Ömer Halil Çavuşoğlu, Gülen Çağdaş
Enhancing decision making processes in early design stages: Opportunities of BIM to achieve energy efficient design solutions

Şeymanur Yıldırım
Investigation on algorithm aided BIM standards to increase collaboration and optimization in project phase: A case study

Dagmar Reinhardt
Sound of space in 3 robotic prototypes: Introducing 6-axis robotic fabrication to shape macro- and micro-geometries for acoustic performance

Güzden Varışlıoğlu, Burak Pınar, Hugh David Clarke
Unconventional formulations in architectural curricula: An atelier on design for outer space architecture

Orkan Zeynel Güzeltu, Sinan Mete Şener
A design evaluation model for architectural competitions: Measuring entropy of multiple factors in the case of municipality buildings

Theory

Ceyda Sarica, Ebru Coşboğcu
Evaluating color combinations using abstract graphics versus pictures of simulated urban settings

Mevlüt Derviş Kahraman, Burak Pak, Kris Scheerlinck
Prediction of heterotopias as public spaces and paradox of political representation: A Lefebvrian approach

Berfin Güley Gören, Lale Beckő
Accessibility of transfer centers with different transportation modes for disabled individuals

Ümit Arpacıoğlu, Mustafa Öğünal
An evaluation on immaterialisation phenomenon in religious spaces of architecture
